- Reading

SUMMARY

Experienced Full Stack Developer with **3 years** of experience in **Angular** and also expertise in **Node.js**, and **MySQL**. Proven track record of developing and maintaining robust web applications, including Deline Media's widely-used product Ovada, known for its success in New York. Proficient in leveraging Angular concepts such as services, directives, and routing. Previous experience includes contributions to Jobie and Unduit Wireless, both widely-used products in the US, as well as working on a product related to the sale and purchase of aircraft. A collaborative team player with a passion for delivering high-quality software solutions

WORK EXPERIENCE

Angular / node developer Oct 2022 - present
Deline Media

As a Full Stack Developer at Deline Media, my expertise lies in crafting and maintaining software solutions for various functionalities. Utilizing **Angular** for the frontend and **Node.js** with **MySQL** for the backend, I ensure seamless integration and optimal performance. Collaborating with diverse teams, I deliver high-quality, user-centric features, constantly innovating and adhering to industry best practices

Angular (frontend) developer Sep 2021 - Oct 2022
Unduit Wireless

Angular Developer at Unduit, contributing to a product related to the sale and purchase of aircraft. Responsible for handling complex logics to enhance the functionality and performance of the product. Collaborated with cross-functional teams to ensure the product met high standards of usability and functionality.

Junior Angular Developer Mar 2021- Mar 2022
SM Techies

Junior Angular developer at SM Techies, gaining hands-on experience with Angular development, contributing to various projects, and enhancing skills in front-end web development. Learned about Amazon Web Services (AWS), including AWS Lambda, AWS S3, and AWS EC2. Collaborated with senior developers to develop and deploy Angular applications, gaining insights into industry best practices.

PROJECTS

Clinic Management www.ovadamd.tk

In the clinic management project at Deline Media, I focused on the billing module's Angular development, handling complex payment processing logics, collaborating with the backend team, and ensuring seamless integration to streamline billing processes and enhance system efficiency for a comprehensive solution, providing a one-stop solution for all billing woes, IT needs, revenue cycle management, and customized EHR/EMR solutions.

Unduit Wireless www.unduit.com

Frontend Developer at Unduit, contributing to the software platform for IT asset lifecycle management. Enhanced user interface and experience, implemented features for procurement, automation, remote recovery, replacement, funds management, environmental reporting, and asset repair services.

Ziofly www.ziofly.com

Angular Developer at Unduit, contributing to Ziofly, a platform aimed at enhancing the buying and selling experience in the aviation industry. Worked on the payments module and handled complex logics to improve transaction processes.
